

Introducing Extend A Hand:

Extend A Hand is the world's only patented folding & locking grab bar. Extend A Hand is your full solution, fall prevention grab bar device.

Our folding grab bars surpass all ADA guidelines. It is superior to the conventional grab bar that is limited to a 1 & 1/2-inch space from the wall. Conventional grab bars are restricted to one side and are often too shallow to offer adequate stability for maneuvering. Extend A Hand's 12 inch locking extension allows for the use of both hands for better stability & improved ergonomics. It is exceptional in small spaces where conventional grab bars can not be used. Extend A Hand accommodates pulling yourself up which requires less upper body strength than pushing yourself from a seated position. All around greater safety is achieved from maneuvering with Extend A Hand grab bars.

“Your full solution, fall prevention device”

Because of its design, the conventional grab bar requires more staff assistance and places staff at a higher risk of injury due to overstraining. This may result in L & I claims and the need to increase staff assistance for one resident. Extend A Hand was developed in an assisted living facility to provide greater safety. Extend A Hand promotes a resident's independence and provides greater safety assistance for the residents and staff.

BENEFITS from using Extend A Hand grab bars:

Lessen the chance of falls:

Extend A Hand will decrease the potential for falls. The retention of residents offers a high return on investment. Imagine the return with incorporation of Extend A Hand folding grab bars.

Lower chances of L&I claim for back and shoulder injuries to staff:

An average claim for back injuries costs \$60,000. You lose a staff member and you are tasked with shuffling staff or hiring a new staff member. All in all, your cost and added stress is excessive. Extend A Hand reduces the potential of injuries.

Safety beyond conventional grab bars:

Conventional grab bars do not extend beyond 1-½ inches off the wall. It is hard to reach and limited. Extend A Hand offers a locking 12-inch extension off the wall. This extension is used to pull yourself with two hands. It enables you to align and lower yourself safely. A secure resting spot that withstands a 600-pound load. It also folds away exposing a conventional grab bar built into Extend A Hand.

Added Independence:

Extend A Hand contributes to the resident's sense of independence and may renew their dignity.

Ergonomics:

Extend A Hand grab bars exceed conventional grab bars ergonomics by promoting two-handed assistance, creating a sense of balance. It promotes use of full upper torso strength for greater leverage.

Return on investment:

Retaining residents, lowering L&I claim's and staff turnover. This means fewer L&I claim's and in turn lower L&I Insurance cost.

Extend A Hand is the full solution, fall prevention device. Keep rooms occupied, staff safer and Lower L&I Insurance rates.
